

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Surgery.  
J. LEWIS SMITH, M.D., Clinical Professor of Diseases  
LEROY MILTON YALE, M.D., Lecturer Adjunct in

A distinctive feature of the method of instruction is  
didactic teaching. All the lectures are given within the  
Winter Session, in addition to four didactic lectures  
three hours are daily allotted to clinical instruction.

The Spring Session consists chiefly of Recitation  
the first of March until the first of June. During the  
months are held by a corps of examiners appointed by  
in the Hospital and in the College Building.

## FEEES FOR THE REG

Fees for tickets to all the lectures during the  
including clinical lectures.....  
Matriculation fee.....  
Demonstrator's ticket (including material for  
Graduation fee.....

## FEEES FOR THE SPE

Matriculation (ticket good for the following Winter  
Recitations, Clinics, and Lectures.....  
Dissection (ticket good for the following Winter

Students who have attended two full Winter courses  
of their second course upon Materia Medica, Physiology  
ful, they will be examined at the end of their third course  
Obstetrics only.

**WILLIAM DARLING, A.M., M.D., F.R.C.S.,**  
New York City, Professor of General and Special Anatomy.

## PROFESSORS OF SP

**WILLIAM H. HAMMOND, M.D.,** New York City, Professor of Diseases of the Mind and Nervous System.

**ROBERT W. TAYLOR, M.D.,** New York City, Professor of Diseases of the Skin.

**A. T. WOODWARD, M.D.,** Brandon, Vt., Professor of the Surgical Diseases of Women; Consulting Physician to Mary Fletcher Hospital.

**HOSPITAL ADVANTAGE.**—The Mary Fletcher will be open for clinical instruction during the session. College will be held in the amphitheatre attached to the College, instruction will be given at the various clinics of the College, instruction will be given at the Department of the University.

**LECTURES ON SPECIAL SUBJECTS.**—These will be given by the most distinguished authorities in their particular departments, with a view to the advancement of the student.

**CLINQUES.**—Besides these Lectures, there will be a series of

**SURGICAL CLINIQUE,** by Prof. Little, every Saturday, from 9 to 12, during the last half of the Session.

**MEDICAL CLINIQUE,** by Prof. Carpenter, on Wednesday morning, during first half of the term.

**CLINIQUE FOR DISEASES OF NERVOUS SYSTEM,** by Prof. Hammond, during his course.

**THE PRELIMINARY TERM,** consisting of a course in the various branches of Medicine and Surgery, will begin on September 1st, and continue until March 1st, 1879. FEE, \$30.

**THE REGULAR WINTER SESSION** will commence on November 1st, and continue sixteen weeks. This course will consist of a course in the various Departments of Medicine and Surgery.

## FEES FOR THE REG

Matriculation Fee, Payable each Term.....

Fees for the full Course of Lectures by the Prof.....

Graduation Fee.....

Material for dissection will be furnished at cost.

The tickets are to be taken out at the beginning of the session.

Students who have already attended two full courses are admitted on paying the Matriculation fee and \$25.

Students who have attended two full courses in some regularly established medical school are admitted to a third course of lectures on paying the Matriculation fee.

**GRADUATES** of this school are admitted without examination.

*Theological Students*, are admitted on general tickets.

Good Board can be obtained at reasonable rates.

## LOEFLUND'S CONCENTRATED

This is Liebig's Soup for Infants in a concentrated form for Mother's Milk. Sole Agent for America,

## GLYCERITE OF PREPARED BY

The oxidizable phosphorous elements of animal origin are preserved without chemical change, and preserved in their original form.

### COMPOSITION OF O

Isolated Hypophosphite of Ammonium.....	Ammonium.....
" " Potassium.....	Potassium.....
" " Sodium.....	Sodium.....
" " Calcium.....	Calcium.....
" " Magnesium.....	Magnesium.....
Glycero-Hypophosphorous Acid.....	Glycero-Hypophosphorous Acid.....
Isolated Hypophosphorous Acid.....	Isolated Hypophosphorous Acid.....
Glycerine, C, P.....	Glycerine, C, P.....

The following are but samples of the general class who have employed Glycerite of Kepheline.

Dr. F. O. St. Clair, Washington, D. C., has found it of great power and unquestionable value in all diseases of the memory, nervous debility, and nervous forms of insanity.

Dr. Geo. B. Simpson, of Weston, West Virginia, has used the Glycerite of Kepheline in phthisis.

Dr. Geddings, in charge of the Sanitarium, at Washington, has used Animal Hypophosphites with satisfactory results, and considers hypophosphites superior to the usual remedies.

Dr. Edwards, editor of the Virginia Medical Journal, has used with Glycerite of Kepheline in the case of a distended stomach from overwork.

Dr. King, of Louisburg, N. C., says, "I am convinced that phosphorous elements form the most powerful and efficient remedy known in tubercular phthisis."

Dr. C. W. Williamson, of Philadelphia, says, "It has been a great and therapeutical triumph. During the past few years, I have seen many cases of exhaustion, and broken down conditions of life, for which I would not now know how to do without it."

Prof. Pepper, of the University of Pennsylvania, says, "It is a good nutrient tonic."

Dr. J. S. Ramsey, formerly Act. Ass. Surg. U. S. Army, says, "It is an efficient remedy known in tubercular phthisis."

Dr. H. E. Ashmead has used isolated phosphorous elements in high esteem as remedial agents.—[Detroit Medical Journal, 1887.]

Dr. Wiley has used isolated phosphorous elements in phthisis.—[See Louisville Medical News, July 1887.]

Dr. Percy says, "Although the nitrogenous elements are not formed in the nerves, I believe it has never been formed in the system."

Upon hypothetical grounds alone we should use the preparations of phosphorus, because it is found to be the most active in the animal system. 658, Essay Phosphorus.

Dose—10 to 20 drops thrice daily.

**NEW YORK.**

Sole Proprietors of LEITER'S PATENT HYPODE

**Fig. 91, The Safety Lister Antiseptic Atomizer**, as made by Codman & Shurtleff, specially adapted to the requirements of Antiseptic Surgery. Spherical Boiler, hard-soldered, tested by hydrostatic pressure to more than 100 pounds to the square inch. Safety Valve, Atomizing Tubes with platinum nozzle and tube cleaner, 10 oz. Reservoir, Brass Safety Spirit Lamp, with Regulator. Non-Conducting Handles, N and E, will supply spray from three to four hours without replenishing boiler or lamp.

It has been termed the "Safety Atomizer," inasmuch as, under the severest tests, it has been found impossible either to ignite vapor from the anæsthetic, or to cause any mishap from the spirit-lamp. We offer it with confidence that it will satisfactorily meet the want of a convenient, durable and practically perfect apparatus for the purpose intended.

### **PRICE, \$25.00.**

We would also call attention to our Antisepticus. Its Boiler, Reservoir and Handle are the safety arrangement with reference to alcohol, and The Atomizing Tubes are of brass, specially adapted. It has been thoroughly tested by practical use, hitherto offered at a price below that of No. 91. septic Atomizer on application.

For full description of other Atomizers, see Formulae of many articles of the Materia Medica known American practitioner, together with details will be sent, post-paid, on application.

Plaster Bandages and Bandage Machines, Air Thermometers, Crutches, Air Cushions, Wheel Chairs for all deformities and deficiencies, Trusses all Medical and Surgical uses, Hypodermic Syringes, Skeletons, Skulls, etc., etc. Naturalists' Instrumental Apparatus, Stethoscopes, Syringes of all kinds, Tee French Rubber Urinals, Urinometers, Vaccine Pneumatic Apparatus, etc., etc.

**Surgical Instruments and Medical Appliances**

Having our Factory, with steam power, annexed with our store, we can promptly make to order material, new instruments and apparatus, and instruments bearing our name are fully warranted. Made in our own factory, and made under our personal supervision for their time, are not likely to slight their work.
